

TOP Wardrobe Lift

The TOP Wardrobe Lift features a shelf installed above the clothes rail - a unique component proprietary to Kesseböhmer. This upper storage shelf moves with the clothes rail as one unit, allowing access to the upper shelf and the clothes rail in tandem.

Sophisticated technology combines force, stability and aesthetics to deliver effortless performance. Based on the Classic Wardrobe Lift, the TOP Wardrobe Lift is one of the most functional components on the market.

Unlike other wardrobe lifts, the CONERO TOP Wardrobe Lift will still move smoothly even if the load distribution is uneven.

The unit's slim-profile power packs are designed to ensure the hinges are concealed. Kesseböhmer also offers shims for other obtrusive elements.
