Only from **CompX Security Products**, the one-stop cabinet lock supplier.

File Frame. Hanging file system kits.

CompX Timberline File Frame kits provide an easy-to-install filing system which will accommodate any drawer size.

Kits contain all components needed to file front-to-back or side-to-side in properly sized drawers.

FF-SK2

- A: Side-to-side rail; FF-LET; 1 per kit
- B: Cut to size cross rail; FF-SKA-25.000; 2 per kit
- C: Cut to size bracket; FF-R25; 2 per kit
- D: Front and back rail; FF-1FL-13.153; 2 per kit

FF-SK3

- E: Side-to-side rail; FF-LEG; 1 per kit
- F: Cut to size cross rail; FF-SKA-25.000; 2 per kit
- G: Cut to size bracket; FF-R25; 2 per kit
- H: Front and back rail; FF-1FL-16.153; 2 per kit

Step 1: Determine kit needed

Step 2: Attach fixed rail

Step 3: Size, cut and install rails

Step 4: Install side-to-side rail

Step 5: And the file system is complete

For lateral files, use two kits to maximize filing space.

For wide lateral file type drawers, with an inside width of **26"** or more, two **FF-SK-2 letter kits** can be used side by side to maximize filing.

For wide lateral file type drawers, with an inside width of **32"** or more, two **FF-SK-3 legal kits** can be used side by side to maximize filing.
