

The ROSTEK Standard

What sets us apart from the rest

Pressed steel mounting plates offer superior strength over traditional cast iron

All stainless steel is premium grade 304

Standard columns are 3" diameter with an average wall thickness of 1.5mm vs. the industry standard of 1mm

Adjustable polyethylene glides protect floors and allow leveling for uneven floor surfaces

3~4 8mm bolts affix the base plate to the column

2~3 bolts secure the top plate; table tops mount firmly and eliminate twisting

A sturdy 0.4" thick regular steel ballast plate is ideal for granite & solid surface tops
