

Say goodbye to hand sanding for your finishing operation

EKASILK PLUS' unique foam structure not only takes the shape of any contours with ease but outlasts conventional abrasives by up to 30 times longer. The flexible latex on the abrasive layer means these sponges are tear-resistant and built to minimize loading. This combination makes for one of the most cost-effective solutions on the market today for all finishing operations.

Sand Faster. Sand Better. EKASILK PLUS.

Profile and Edge Sanding

Attach EKASILK PLUS 1/2 in. sponge to your sander to match any shape of your workpiece with ease and speed. And say goodbye to hand sanding moldings, profiles and edges.

Shaker Door Sanding

EKASILK PLUS 10mm sponge allows you to sand inside a shaker door's dropped areas and depressions without leaving marks or damaging the internal edges.

Tight Spaces Sanding

Offset the 5mm sponge on a 3"x4" orbital sander and sand those hard to reach areas faster, with minimum effort and more evenly.

EKASILK PLUS Upgrade Your Finish

EKASILK PLUS from Uneeda is the answer to the most common finish sanding problems. Coming in an array of sizes, grades and thicknesses to cover all the bases, the EKASILK system will speed up your finishing, by eliminating hand sanding and giving you back your time, energy and money, all while delivering the best finish possible.

Thickness options

1/2 in.

For curved and profiled surfaces

10mm

Perfect for shaker doors sanding

5mm

Flat panels sanding & swirl marks removal

Advantages

- Outlasts conventional abrasives by up to 30 times
- Eliminates the use of hand sanding
- Adapts to any contours and profiles
- Consistent cut and finish throughout
- Available in vented holes to maximize dust extraction

Grit equivalence

Coarse	P80
Medium	P120-150
Fine	P220-240
Very Fine	P320-380
Superfine	P450-500
