

## Cleaning of shower/bath seats reference sheet

After every use:

Wipe down all damp surfaces with a dry towel and allow to fully air dry before closing.

Weekly cleaning

**DON'T:** Use abrasive cleaners or commercial cleaning products on wood or frame. Do not use wire brush, steel wool, or abrasives such as scrubby pads, clothes, or paper. Never use abrasive powders or liquids.

**DO:** Use a mild soap (like Murphy's oil soap) and a soft cloth. Wash all surfaces with warm soapy water and rinse clean. If you have a fold down seat, remove the back panels and wash the wall behind wood to help prevent mold from getting established. Always wipe seat panels in the same direction as the wood grain. Dry thoroughly all parts of the seat and surrounding wall. Allow sufficient time for all surfaces to completely air dry before replacing seat back panels into frame.
